

I currently have 3 XM radio subscriptions. I have one in my wife's Tahoe, I have one at home and I have one at work. I love the stations and will never go back to FM. I believe it is my right to choose to pay for services that I wish to receive, without commercials. I also believe that part of my subscription should be for local weather and traffic reports. I chose XM because of the perfect clear digital audio quality sound and the lack of commercials. Any additional services that XM can provide to me I welcome with open arms. I believe that in time, as the XM services continue to grow, the annual subscription fees will increase also. I don't have a problem with that. I don't mind paying for good service and quality products. I believe the NAB is attacking XM because they are afraid XM will take over their listeners. They are right, XM will take their listeners. How about that! People like me are "paying" to get the services and quality that AM and FM cannot possibly deliver. Way to go XM! I support you all the way and keep up the fantastic programming and info channels. Thanks,
Mike Noles
